Prof Deirdre Duke, (MB BCH BAO, MRCPI, FFR (RCSI), MSc (Rad. Sciences), Honorary Clinical Associate Professor, RCSI) from Ireland has over 20 years of experience in radiology with a special interest in breast imaging in both Ireland and USA.

Deirdre is currently head of the radiology department in a Beaumont hospital, Dublin a busy tertiary referral hospital and cancer centre which is affiliated to the Royal Colleges of Surgeons in Ireland. Beaumont breast centre focuses on symptomatic breast care as well as providing a screening programme for high-risk patients.

Deirdre has served on several committees within the Irish National Cancer Control Programme in Ireland tasked with updating national guidelines and policies.

Her research interests are varied but predominantly focus on quality of patient care as well as the optimisation of resources to promote equal access for all. She has a keen interest in AI and teaches on a micro-credential course entitled “AI and medical imaging”.

Giving back to society is important to Deirdre who volunteers for several local organisations which promote sport and leadership in teenagers and young children.
