

Jörg Heil

WG Member

Prof. Dr. med. Jörg Heil, MHBA, is a German physician and academic specializing in breast cancer surgery and senology. He currently serves as Head of Department at the Breast Center of Heidelberg Breast Unit, where he leads a multidisciplinary team focused on individualized breast cancer care. After completing his medical studies and doctorate at the University of Heidelberg, he pursued further academic qualifications including a PhD and a Master of Health Business Administration.

Prof. Heil's clinical and research interests center on oncological and oncoplastic breast surgery, with particular attention to patient-centered outcomes and quality of life. He has contributed to over 150 peer-reviewed publications and has served as principal investigator in several national and international clinical trials. His work reflects a commitment to integrating surgical innovation with evidence-based medicine.

In addition to his clinical responsibilities, Prof. Heil is actively involved in teaching and mentoring at the University of Heidelberg. He regularly presents at professional conferences and contributes to collaborative research initiatives in the field of multidisciplinary breast cancer care.

His contributions have been recognized with several awards and honors from medical societies and foundations. While maintaining a strong academic profile, Prof. Heil emphasizes the importance of compassionate care and interdisciplinary collaboration in improving treatment strategies for breast cancer patients.
