

Sabine Siesling

WG Member

Sabine Siesling, clinical epidemiologist, is professor 'Outcomes Research and Personalized cancer care' at the University of Twente and senior researcher at the Netherlands Comprehensive Cancer Organisation (IKNL). She focusses on the effect of interventions, such as care pathways or implementation of new technologies, on the quality, organisation and outcome of cancer care. She tailors care and follow-up using/developing prediction models which are based on big real-world data from e.g. the Netherlands Cancer registry. Her scientific research includes international projects on the burden of cancer such as Cancerwatch, EUROCARE, EUROCOURSE, RARECARE and CONCORD.

She is board member of the National breast cancer working group (NABON) and the NABON Breast cancer audit (NBCA) and PROMS sections, and the first European Initiative on Breast cancer Care-Quality assurance Development group (ECIBC). Moreover, she has been chair of the program on Women's Health at the University of Twente. In which a multidisciplinary group of researchers works together on women's health and gender medicine-related topics work together on technological solutions for health and well-being to identify and address knowledge gaps, specific unmet needs and unresolved problems in various life phases of women. Furthermore, she has been board member of the European (ENCR) and International Association of Cancer Registries (IACR), and president of the Netherlands Epidemiological Society (VvE). She is now chair of the Board of advice of the VvE. She is co-editor of the books: 'Breast Cancer: Global Quality Care'.
