Anne-Marie Baird, PhD, PG Dip (statistics), B.Sc. (Hons)

WG Member

Anne-Marie Baird is a Senior Research Fellow at the Trinity Translational Medicine Institute, Trinity College Dublin, Ireland. She completed her Ph.D. in Clinical Medicine at Trinity College Dublin, where she investigated the role of inflammatory mediators and hypoxia in lung carcinogenesis. Anne-Marie also holds a Postgraduate Diploma in Statistics and a B.Sc. (Hons) in Biochemistry and Molecular Biology.

With over 15 years of experience in translational cancer research, Anne-Marie has held academic appointments at Trinity College Dublin and Queensland University of Technology, Australia. Her research focuses on lung cancer biology, inflammation, immune regulation, biomarkers, drug resistance, and the development of novel therapeutic approaches. She has secured competitive national and international funding as principal investigator, co-principal investigator, mentor and collaborator, and has supervised and mentored many postgraduate and early career researchers.

Anne-Marie has an established publication record in translational cancer research. She has also contributed to national and international initiatives in cancer research, screening, survivorship, personalised medicine, and patient advocacy. Alongside her research career, she is an internationally recognised lung cancer advocate. She served as President of Lung Cancer Europe (LuCE) from 2020 to 2025 and has worked with many organisations including the European Society for Medical Oncology (ESMO), the International Association for the Study of Lung Cancer (IASLC), and the European Thoracic Oncology Platform (ETOP).

Through her academic and advocacy work, Anne-Marie is committed to advancing person-centred research, equitable access to care and improving outcomes for people impacted by lung cancer.
