Pilar Garrido, MD, PhD

WG Member

Dr. Pilar Garrido is Head of the Department of Medical Oncology at Hospital Universitario Ramón y Cajal (Madrid) and Professor of Medicine at the University of Alcalá. She leads the Translational Lung Cancer Research Group at the Ramón y Cajal Health Research Institute (IRYCIS) and the Thoracic Tumours Clinical Research Group within CIBERONC.

Her research focuses on precision oncology, predictive biomarkers, immunotherapy, the gut microbiota, liquid biopsy, radiomics, and sex and gender perspectives in cancer. She has led several competitive research projects funded by the Instituto de Salud Carlos III (ISCIII) and has served as local principal investigator, national coordinator or international coordinator in more than 150 clinical trials.

Dr. Garrido has authored more than 370 peer-reviewed publications and has played a leading role in the development of international clinical practice guidelines and consensus documents through the European Society for Medical Oncology (ESMO) and the International Association for the Study of Lung Cancer (IASLC). She is an ESMO Fellow, Associate Editor of Annals of Oncology, and a member of the IASLC Academy.

Beyond her academic and scientific activities, Dr. Garrido is deeply committed to improving cancer care through close collaboration with patient organizations. She serves as Chair of the National Technical Council of the Spanish Association Against Cancer (AECC) and as Trustee of the AECC Scientific Foundation, promoting patient-centered research, education and advocacy initiatives aimed at improving outcomes and quality of life for people living with cancer.
