Giuseppe Gorini, MD

WG Member

Giuseppe Gorini, WG member, MD, is senior epidemiologist, at the Oncologic Network, Prevention and Research Institute (ISPRO) in Florence, Italy. He obtained the Degree in Medicine and Surgery in 1992 at the University of Pisa, the Specialization Degree of Public Health and Epidemiology in 1997 at the University of Florence, and the Specialization Degree in Biostatistics at the University of Milan in 2000.

He began working at the Epidemiology Unit at Local Health Unit of Milan (1998-2001), and from 2001 onwards he has been working at ISPRO. Main research interests encompass evaluation of primary prevention interventions, with a special focus on evaluation of tobacco control and second-hand smoke exposure regulations. He participated to many European Projects on second-hand smoking exposure before and after the smoking bans in Europe. In the last 10 years he worked on novel tobacco products, on implementation research for cancer primary prevention interventions, and on cancer screening programs, especially in a lung cancer screening pilot integrated with smoking cessation developed in Italy, and in the study of opportunistic prostate cancer screening and of population-based prostate cancer screening pilots in Italy.

Moreover, he is participating to PRAISE-U+, the EU project on prostate cancer screening pilots. He is the author or co-author of around 300 publications indexed in PubMed, and he is the Vice-President of the Italian Society for Smoking Prevention and Cessation (SITAB).
