Patrick Redmond, PhD

WG Member

Patrick Redmond is a general practitioner and Associate Professor in General Practice at RCSI University of Medicine and Health Sciences, Dublin. He holds a PhD, a Master's degree in Medical Education and postgraduate training in statistics.

He leads PRiCAN (Primary Care Research into Cancer), a multidisciplinary research group focused on the contribution of primary care to cancer prevention, screening and early diagnosis, with a particular emphasis on cancers associated with poor prognosis. His research programme includes lung cancer screening implementation, risk stratification, diagnostic pathways, health inequalities, digital health, artificial intelligence and the use of routinely collected primary care data.

He co-leads the Irish Cancer Society Lung Health Check pilot, a community-based study evaluating targeted low-dose CT lung cancer screening integrated with general practice and contributes to European cancer-screening initiatives including SOLACE and EUCanScreen.

His work brings together primary care, radiology, respiratory medicine, oncology, public health, health economics, data science and patient partners, with a particular interest in translating evidence into practical and equitable cancer pathways.
