

Joakim Dillner MD PhD

WG Member

Joakim Dillner is Professor of Infectious Disease epidemiology at Karolinska Institutet, Sweden, and Head of Section for Molecular Cancer Diagnostics at the Karolinska University Hospital.

Since 1989, his group has conducted Human Papillomavirus (HPV) research in molecular biology, immunology and vaccinology, clinical virology and epidemiology.

His major ongoing projects include Swedescreen, a randomised trial of HPV-screening (initiated in 1997), biobank and registry-based follow-up studies of HPV vaccination (initiated in 1999), and projects hosted by the International Papillomavirus Reference Center (www.hpvcenter.se), the National Quality Registry of Cervical Cancer Prevention, and RISCC - Risk-based Screening for Cervical Cancer (RISCC Risk-based Screening for Cervical Cancer (www.riscc-h2020.eu)).
