

Thanos Kosmidis

QASDG External Expert

Thanos Kosmidis holds a combined Bachelor's and Master's degree in Computing from Imperial College, and a Master of Science in Information Networking from Carnegie Mellon University (CMU). He is also an Advanced Study Fellow at the Massachusetts Institute of Technology (MIT).

His expertise spans multiple disciplines around research and development and commercial application across the fields of information technology, telecommunications and healthcare. Mr Kosmidis has held positions of increasing seniority in the high-tech industry in the United States and in Europe. Furthermore, he has led several large projects from inception to delivery, managing the complete lifecycle of products and services, and personnel which spans multiple countries.

Most recently, he co-founded Care Across, an online platform for cancer patients and caregivers. The platform provides cancer patients with reliable, evidence-based information, support, guidance and interactive tools. This way, Care Across helps those affected by cancer to manage their day-to-day lives with their condition, strengthening their partnership with their medical team.

A frequently invited speaker to scientific and entrepreneurial conferences across Europe, Mr Kosmidis is the national chapter leader for the Health 2.0 organization, and a mentor in many digital health programs for startups.
